Student ID (1):- A00067312

Student Name (2) :- Abhishek Maheshkumar Parikh

Student ID (2) :A00075992

ORNAMENT RETAIL MANAGEMENT SYSTEM

❖ ***ORNAMENT RETAIL MANAGEMENT SYSTEM SUMMARY***

♦ **BUSINESS IDEA OVERVIEW :-**

The Database Management System will help the shop to easily find product details, record sales, check stock, customer information, manage the inventory and keep track of its daily operations. At present, most ornament shops store their data manually or in a business book, which can lead to mistakes, missing information, and delays. The objective of this system is to make all business data organised, accurate, and easy to access in one place. The database will make it simple to find product details, record sales, check stock, manage suppliers, and keep customer information safe.

♦ **WORK OBJECTIVES:-**

- To build a database that can store, find, and manage ornaments store details effectively.
- To show how customers, employees, branch, category, products, orders, and payments are all linked together.
- To make sure the data is correct by using special links to connect everything correctly.
- To let people quickly see customer purchases, what items are available, and the performance of each store.
- To keep things simple between the product, inventory and supplier by keeping good records of the data.
- To include useful features like sales, membership, and ways to give feedback to improve business operations.

ERD

PHYSICAL DATA MODEL

CUSTOMER

Column	Type	Key
cust_id	INT(20)	PK
name	VARCHAR(50)	
Cont_no	BIGINT(10)	
email	VARCHAR(50)	
address	VARCHAR(100)	

BRANCH

Column	Type	Key
branch_id	INT(20)	PK
name	VARCHAR(50)	
Cont_no	BIGINT(10)	

EMPLOYEE

Column	Type	Key
emp_id	INT(20)	PK
name	VARCHAR(50)	
role	VARCHAR(30)	
phone	BIGINT (10)	
branch_id	INT(20)	FK

CATEGORY

Column	Type	Key
cat_id	INT(20)	PK
c_name	VARCHAR(30)	
material	VARCHAR(30)	
description	VARCHAR(50)	

SUPLIER

Column	Type	Key
Sup_id	INT	PK
name	VARCHAR(50)	
cont_no	BIGINT(10)	
address	VARCHAR(30)	

PRODUCT

Column	Type	Key
pro_id	INT(20)	PK
name	VARCHAR(50)	
cat_id	INT(20)	FK
weight	VARCHAR(20)	
description	VARCHAR(50)	
price	DECIMAL(10,2)	
sup_id	INT(20)	FK

INVENTORY

Column	Type	Key
pro_id	INT(20)	FK
branch_id	INT(20)	FK
quntity	INT(20)	
last_update	DATE	

MEMBERSHIP

Column	Type	Key
mem_id	INT(20)	PK
cus_id	INT(20)	FK
type	VARCHAR(30)	
start	DATE	
end	DATE	

SALE

Column	Type	Key
sale_id	INT(20)	PK
pro_id	INT(20)	FK
offer	VARCHAR(40)	
status	VARCHAR(30)	

ORDERS

Column	Type	Key
order_id	INT(20)	PK
cust_id	INT(20)	FK
Mem_id	INT(20)	FK
order_date	DATE	
sale_id	INT(20)	FK
total_amount	DECIMAL(10,2)	

PAYMENT

Column	Type	Key
payment_id	INT(20)	PK
order_id	INT(20)	FK
payment_date	DATE	
method	VARCHAR(20)	
amount	DECIMAL(10,2)	

FEEDBACK

Column	Type	Key
feed_id	INT(20)	PK
cust_id	INT(20)	FK
pro_id	INT(20)	FK
rating	INT(20)	
review	VARCHAR(200)
